

SGG UK

PRODUCT NAME
SGG MASTERGLASS

SUBTITLE
A contemporary range of design glasses, combining style and brilliance.

DESCRIPTION
SGG MASTERGLASS is manufactured by casting and rolling the glass between two moulded cylinders. This extremely precise process leaves a crisp, textured effect on the glass. One face of the glass is textured and the other is smooth.

PERFORMANCE
Light transmittance 84% to 89% depending on the pattern (6 mm thickness). These values correspond to a light transmittance which is mainly diffused. Full spectrophotometric performance:
- for single glazing
- in SGG CLIMAPLUS double-glazed units, with SGG PLANITHERM TOTAL low-emissivity glass.

STANDARDS AND REGULATION
SGG MASTERGLASS is a patterned glass and all quality aspects conform to standard BS EN 572-5. It will receive CE marking when it is officially in force.

PRODUCT APPLICATION
This new generation glass can be incorporated in any type of residential and professional projects (offices, shops, hotels and restaurants). SGG MASTERGLASS is intended for a wide variety of applications: - Fixed or sliding partitions - All-glass doors and framed doors - Windows and glazing in façades - Shower and bath screens - Furniture (cabinet doors, tables, counters, shelves) - Indoor and outdoor guarding - Balcony screens - Stair treads, floor panels
